

J.L. Hardscape, Inc. specializes in complete outdoor innovations. Some of our strong points are, but not limited to, any aspect of concrete flatwork as well as engineered designed retaining walls.

JHL has strived to help local customers make their dream projects a reality. We will provide a free, professional consultation with an estimate. We want nothing more than to provide fast, professional results to your outdoor ideas. Our hope is to leave you with the same lasting impression personally that we did professionally!

As we've grown through our years in business, one thing we've realized is the importance of customer satisfaction. It's extremely crucial to know word of mouth from a pleased client is the most efficient way to help business grow.

We started as a smaller residential outfit that was looking to help deliver a fair and quality finished product at an extremely competitive rate. As time has taken us further on this journey, we've found our way into some light commercial projects, not just locally, but we also travel to provide our services for commercial and residential projects.

It's J.L.H.'s mission to continuously provide a very professional but competitive source of knowledge and skill regardless the project size or challenges!
